

# Technical Information and Connection Guide

- ✓ ZERO (0) OHM FUNCTIONALITY
- ✓ NO TRANSFORMERS REQUIRED
- ✓ MULTIPLE LOUDSPEAKERS CAN BE CONNECTED IN PARALLEL
- ✓ ANY SPEAKER IMPEDANCE CAN BE USED: 2/4/8/16 OHM
- ✓ UNIFORM POWER DISTRIBUTION OVER LONG DISTANCE CABLE RUNS
- ✓ FULL RANGE FREQUENCY RESPONSE

**ZERO-OHM Multispeaker System** is a passive device that interconnects between any amplifier and multiple loudspeakers without worrying about amplifier speaker loads, impedance and extremely long cable runs. This Patented Design eliminates the need for 70V-100V transformer products.

Example of a simple 16 x 8 Ohm/100 Watt parallel speaker connection to a typical 800 Watt per channel stereo amplifier. Power/Wattage is divided evenly between each speaker without the use of 70V-100V speaker transformers or amplifiers.
